SUMMARY

Full-stack web developer with expertise in React.js, Node.js, and Laravel, CodeIgniter, experienced in designing, deploying, and maintaining scalable web applications. Skilled in REST API development, cloud deployment (AWS, Render, Vercel), and Agile workflows. Proven track record in system migrations and infrastructure optimization for government and enterprise projects. Passionate about building high-performance solutions through collaboration and adopting modern DevOps practices.

CORE SKILLS

Frontend: HTML5, CSS3, Bootstrap 5, React.js, Figma, WordPress

Backend: Node.js, Express.js, PHP, Laravel, CodeIgniter(v3 & v4), Spring Boot

Databases: MySQL, MongoDB (Mongoose)

DevOps & Deployment: AWS, Render, Vercel, Apache2, Git/GitHub, Git Bash, Postman

Testing: Mocha, Chai, Chai-http

Data Tools: Python (pandas, numpy), PowerBI, SQL

Project Management: Trello, SDLC, Agile

PROFESSIONAL EXPERIENCE

Searix

Full Stack Web Application Developer | Jul 2024 – Present | Remote

- Configure, customize, and deploy **event management systems** for diverse clients, supporting **20+ events** and improving operational setup time by **30%** through optimized configuration workflows.
- Conduct thorough testing, debugging, and performance optimization, reducing post-deployment issues by **25%**.
- Manage multiple client deliverables and timelines across **2-5 concurrent projects**, ensuring on-time and high-quality delivery in fast-paced environments.

Department of Science and Technology – Philippine Textile Research Institute (DOST-PTRI)

Project Technical Assistant IV | Oct 2024 – Jun 2025 | Taguig City, PH

- Initiated migration of **PTRI Government Website** from Joomla to WordPress (PHP, MySQL), increasing content publishing efficiency by **40%** and expected to reduce maintenance hours by **30%** and handle **50% more traffic** (deployment in progress).
- Developed **Events Management System** with secure user authentication and profile features, reducing manual registration workload by **50%** and improving attendee data accuracy.
- Maintained and enhanced **Philippine Textile Congress Portal** (PHP, MySQL), increasing system uptime from **95% to 99.9%** through proactive monitoring and database optimization.
- Architected and documented information system architecture in collaboration with cross-functional teams for multiple digital transformation initiatives.
- Managed ICT infrastructure improvements, reducing downtime by **20%** via optimized configurations.

Power Integrations Inc.

Intern – LED Department | Jun 2019 – Jul 2019 | Pasig City, PH

- Reviewed and tested LED product prototypes, providing technical feedback that informed final design iterations.
- Completed 240 hours of hands-on hardware and software integration work.

PROJECTS

Full-stack E-commerce Application (React.js, Node.js, Express.js, MongoDB, AWS → Render, Vercel)

- Built a fully functional e-commerce platform with secure authentication and admin product management.
- Migrated backend from AWS EC2 to Render, reducing hosting costs by 30% and cutting deployment time from hours to minutes.

Philippine Textile Congress Portal (PHP, MySQL)

- Enhanced portal features and optimized database queries, achieving 25% faster page load times.
- Monitored and maintained user database, generating analytics for management.

Events Management System – DOST-PTRI (Laravel, MySQL)

- Developed event registration and user authentication modules to streamline conference participation.
- Designed and documented system architecture for long-term maintainability.

PTRI Government Website Migration (WordPress, PHP, MySQL)

- Migrating official PTRI website from Joomla to WordPress to improve maintainability and scalability.
- Implemented redesigned content structure for faster publishing and better accessibility compliance.

Personal Portfolio Website (React.js, Vercel)

- Designed and deployed responsive personal portfolio showcasing projects and technical expertise.

Selected Additional Projects

- Blog API – REST API with CRUD operations for blog posts; React.js frontend deployed on Vercel & Render.
- Weather App – React.js UI integrated with third-party Weather API for real-time data.
- Calculator – Basic calculator using HTML, CSS, JavaScript; hosted on GitHub.
- Todo List App – Simple task manager with add/remove functionality using JavaScript; hosted on GitHub.
- Front-end Capstone – Responsive website with UI/UX best practices using HTML, CSS, Bootstrap.
- Back-end Capstone – E-commerce API with user authentication & CRUD operations using Express.js.

EDUCATION & CERTIFICATIONS

Zuitt Web Developer Program – MERN Stack (Full-stack Web Development)

Additional Training: MySQL, PHP, Laravel, JavaScript OOP, Java, Spring Boot, Unit Testing

University of Santo Tomas – BS in Electronics Engineering

GWA: 1.875

ADDITIONAL INFORMATION

Professional Civil Service Passer

Fast learner, adaptable to new technologies, and effective collaborator who thrives in both team-based and independent projects
